WORK EXPERIENCE

01/09/2023 – 30/09/2024 Multan, Pakistan
SOFTWARE DEVELOPER YOOSHAYSOFT TECHONLGIES

Web Development: Designed, developed, and maintained web applications using PHP, Laravel, and other web technologies. Ensured applications were responsive across different devices and browsers.
Database Management: Created and managed MySQL databases, including schema design, query optimization, and data integrity.
Code Quality Assurance: Wrote clean, efficient, and maintainable code following industry best practices. Participated in code reviews and provided constructive feedback to peers.
Version Control: Used Git for version control, managing branches, merges, and ensuring smooth collaboration within the development team.
Debugging and Troubleshooting: Identified, analyzed, and fixed software defects, optimized performance, and resolved technical issues in applications.
Collaboration and Teamwork: Worked closely with designers, project managers, and other developers in an Agile environment to ensure timely delivery of projects.
Continuous Learning: Kept up-to-date with emerging technologies and industry trends through workshops, training, and self-study.

PROJECTS

16/06/2023 – 02/09/2023
Final Year Project: GoDriveNet - Cloud Storage with Integrated Chat System

Role: Project Lead / Full-Stack Developer

Description: Developed GoDriveNet, a comprehensive cloud storage solution akin to Google Cloud, featuring additional functionalities such as user friend addition, integrated chat system, and user search capabilities.

Technologies Used: HTML, CSS, Bootstrap, JavaScript, PHP, MySQL, AJAX

Key Responsibilities:
  • Designed and implemented a user-friendly web interface for cloud storage.
  • Developed back-end services for file storage, retrieval, and management using PHP.
  • Integrated real-time chat functionality between users.
  • Implemented user authentication and authorization systems.
  • Developed a friend management system allowing users to add and manage friends.
  • Created a user search feature to find and connect with other users.
  • Ensured data security and privacy through encryption and secure login mechanisms.

01/10/2023 – 30/03/2024
E-commerce Integration with eBay API Project

Role: Full-Stack Developer Intern

Description: Completed an e-commerce project during an internship at ArtexSol, integrating with the eBay API to manage products and orders. The system allows for adding and updating products, retrieving orders, and fetching categories, subcategories, and leaf categories specifically for the USA, UK, and Australia eBay APIs. This project involved implementing third-party API integration for seamless e-commerce functionality.

Technologies Used: HTML, CSS, JavaScript, PHP, Laravel, MySQL, eBay API

Key Responsibilities:
  • Developed back-end services using PHP and Laravel for efficient data handling.
  • Integrated the eBay API to add and update products on the platform.
  • Developed functionality to fetch categories, subcategories, and leaf categories for the USA, UK, and Australia eBay APIs.
  • Created distinct roles and dashboards for sellers, resellers, stock owners, and warehouse managers.
  • Implemented functionality to retrieve and manage orders from eBay.

- Developed an admin dashboard for comprehensive store management.
- Developed user authentication and secure access for managing the eBay account.
- Collaborated closely with a team member to manage both front-end and back-end development tasks.

10/02/2024 – 15/02/2024
Freelance Localization Project

Role: Freelance Full-Stack Developer

Description: Completed a freelance project for a CV maker website developed in Laravel, focusing solely on localization features.

Key Responsibilities:
- Implemented localization features allowing users to select between Arabic and English.
- Ensured accurate translation and cultural relevance for both language versions.

03/02/2024 – 10/03/2024
Small Tools-Based Development Project

Role: Freelance Full-Stack Developer

Description: Developed various small tools for clients, including an age calculator, distance calculator, fractional calculator, and a simple calculator using HTML, CSS, JavaScript, and Bootstrap.

Key Responsibilities:
- Designed and implemented calculators for specific client needs.
- Ensured user-friendly interfaces and accurate calculations.

PUBLICATIONS

2024
GoDriveNet: A Unified Platform for Cloud Storage with Social Networking

Conducted a study utilizing Go Drive Net as a research tool to analyze user data persistence across various cloud storage methods. Investigated user software data, network connection captures, and memory captures to enhance understanding of data management on multiple devices. The research highlighted the importance of cloud storage in improving productivity, collaboration, and data security through encryption technology. Key findings emphasize the need for effective data handling practices in the evolving landscape of cloud computing.

VOLUNTEERING

07/05/2020 – 04/07/2020 Multan, Pakistan
COVID-19 Pandemic Relief Volunteer

Organization: Independent Volunteer

Mission:
- Distributed food and household items to individuals and families in need during the COVID-19 pandemic.
- Coordinated with local suppliers and community organizations to source and deliver essential items.
- Ensured health and safety protocols were followed during distribution to protect recipients and volunteers.

Impact:
- Provided critical support to approximately 30+ families during a period of heightened need.
- Helped alleviate food insecurity and contributed to the well-being of the community during the pandemic.
